

Bachelor of Arts in International Economics

Schiller International University's degree in International Economics provides a thorough training in economic theory and policy

Implementing concepts of economics to understand and run businesses

The impact of economics is examined at many levels. Students learn how economics affect the individual and the company and the effect of economic policy at national and international levels. The degree program stresses the importance of international economic relations and of maintaining a comparative international perspective.

This degree includes courses in international business administration, international relations and political science. Students graduating with this degree go on to careers focusing on economic and political analysis in areas of government, business, finance, international relations or law.

Typical related careers:

-  **Accountant**
-  **Economic Analyst**
-  **Statistician**
-  **Financial Consultant**

My education at Schiller has given me the opportunity to work and develop a successful career at IBM in Spain. Throughout my career, I have held different jobs, requiring daily interaction with managers and partners worldwide. Having studied at SIU, in both Paris and Heidelberg, helped me expand my employment opportunities. My education provided me with the communication skills and confidence. Which has helped me interact with others when dealing with people from different cultures and different points of view. I have become a more open-minded person, resolute, and more respectful of other cultures. Schiller University has also provided me with a great diversity of friends from all over the world.
